

Abacus emulator forecast for galaxy-galaxy lensing+clustering [ $\sim >4$  Mpc/h]  
(SDSS  $M_r < -21$ -like HOD model)

Assumes 10% (uncorrelated) relative errors on  $\xi_{gg}$  and  $\Omega_M \xi_{gm}$ ; 5% prior uncertainty on  $n_{gal}$   
All uncertainties are fractional.
